

14 December 1960

25X1

MEMORANDUM FOR: Chief, Security Division, [REDACTED]  
Regional Office  
Los Angeles, California

25X1

SUBJECT : [REDACTED] Research Memorandum, RM 2490

REFERENCE : Your correspondence of 20 October and 6 December 1960.  
Attn of - Sec/AJH/HO 3-3181

1. The problem of locating the four remaining copies of the subject document was referred by this office to the Agency Office of Security.

2. The Office of Security also was unable to locate the four copies. In consideration of the following facts, it is the opinion of that office that the degree of compromise would have been slight:

- (a) The subject would have been of particular interest to those persons who are cleared for Restricted Data.
- (b) It is standard practice throughout the Agency to return technical reports to the main library where they are retained or destroyed as appropriate (unclassified documents are destroyed with classified items by burning).

3. It is the opinion of this office that all possible avenues have been explored and that no additional action would prove fruitful, since the subject document was received and handled as unclassified.
